

What is it?

Learn, Grow, Cook is an interactive opportunity to incorporate nutrition education, gardening, and culinary skills. The program will be available to 4th and 5th grade students throughout the district as a field trip to the Child Nutrition Center. The capacity per field trip is 25 students. Components of the program are:

1. The Learning Lab
 - a. Hands on interactive classroom with designated stations that represent food components.
2. The Growing Garden
 - a. Includes student participation of planting and harvesting seasonal products as well as learning about food agriculture.
3. Culinary Kitchen
 - a. Includes cooking and food safety skills for students.
